

MACHINE IMAGE FACTORY IN LESS THAN 30 DAYS

TO ACCELERATE MACHINE IMAGE DEPLOYMENTS

WHAT IS A MACHINE IMAGE FACTORY?

The use of the 2nd Watch Machine Image Factory reduces the time to deploy an updated and hardened custom machine image by up to 95% and reduces the time to implement a solution by 75%. Customers will receive a tested, proven and trusted framework for automation of the image creation process, leveraging Packer, Ansible and Terraform with options for Chef, Puppet or AWS CloudFormation. The Machine Image Factory can be deployed on AWS, Azure or with agnostic technologies, and customers may select any of the following patterns:
