

CLOUD COST OPTIMIZATION DISCOVERY SESSION

DEMYSTIFY THE WAYS TO SAVE MONEY ON YOUR CLOUD INVESTMENT

With cloud agility and scale comes cost, and as most enterprises know, controlling cloud spend is a complex and time-consuming process. Industry experts suggest that 35% of cloud spend is wasted blindly dialing back cloud infrastructure, leaving systems lagging and customers unhappy. True cloud cost optimization requires an in-depth understanding of your application architecture and current usage, ensuring you can meet the same service levels at a lower cost.

GET STARTED WITH CLOUD COST OPTIMIZATION THE RIGHT WAY

The 2nd Watch Cloud Cost Optimization service can **reduce your cloud computing costs by 25-40%**, increasing efficiency and performance. Our proven methodology empowers you to make data driven decisions in context, not relying on tools alone.

Learn about the 6 pillars of cloud optimization and how they overlap to form a greater benefit to your organization.

Take a deep dive into cloud spend best practices for widely-distributed environments.

Determine lasting changes to sustain cost savings over time.

Drive cost savings practices down to individual application owners and teams.

OFFER

Cloud cost optimization doesn't have to be time consuming and challenging. Start your cost optimization plan with our proven method for success at <https://offers.2ndwatch.com/optimization>.
