

2ND WATCH

CLOUD MIGRATION COST ASSESSMENT

Moving to the public cloud can be a complex and time-consuming endeavor. Without the proper tools and cloud know-how, estimating cloud costs based on limited information can be inaccurate. Determining currently used resources and mapping those correctly to the cloud is a critical step to optimizing cost and increasing business agility.

2nd Watch's Cloud Migration Cost Assessment simplifies and accelerates the path from on-premises to the cloud with instance rightsizing and TCO analysis. Our Cloud Enablement Team evaluates your on-premises IT estate and maps current resources to the most cost-effective solution in the cloud, providing you an estimate of the cost to migrate as well as the ongoing cost of your optimized cloud environment.

WITH THE CLOUD MIGRATION COST ASSESSMENT YOU GET:

Analytics based right-sizing to cloud and on-premises vs cloud cost modeling

Provide the instance details and business case analysis at high-level and detailed level that can be backed up by data

Benchmark current costs from reference catalog and future costs from cloud catalog

Analysis of optimum use of existing licenses

Resource/Workload to cloud mapping

Automatically find the best cloud instance size to meet your needs based on historical usage and current provisioning

Proposal to perform migration to optimum cloud configuration- including cost to migrate

ABOUT 2ND WATCH

As one of the first companies to become an AWS Premier Partner, a Microsoft Azure Gold Partner and recognized by Gartner® as a Leader and Challenger among Managed Service Providers, 2nd Watch is audited, approved and accredited—offering you a team of highly trained and certified cloud experts. Our TESTED, PROVEN and TRUSTED solutions allow you to fully leverage the power of the public cloud. We are your partner, working along side of you, to design, deploy and manage your public cloud environment.
