2ND WATCH

CLOUD READINESS ASSESSMENT

YOUR PERSONALIZED PLAYBOOK FOR ENTERPRISE CLOUD MIGRATION

Moving to the public cloud can be a complex and time consuming endeavor. Deciding how and when to transition your mission-critical applications to the public cloud is essential to optimizing cost and business agility. 2nd Watch's Cloud Readiness Assessment will evaluate your company's IT estate to determine fitness and the best migration methodology for your workloads, to shed technical debt, improve resiliency, and reduce cost. 2nd Watch's Cloud Enablement Team analyzes and assesses your computing environment and determines its viability for the public cloud. Rather than relying on software outputs alone, 2nd Watch Cloud Architects and Engineers perform an in-depth, technical application assessment of your IT platform and work with your team to develop a playbook of cloud platform concepts that are oriented towards achieving your migration objectives.

The Cloud Readiness Assessment includes:

| In-depth discovery workshops conducted by Certified Architects and Engineers | Aggregated analysis and reporting | List of application dependencies | Migration roadmap and plan | Migration complexity ranking for your apps |

ABOUT 2ND WATCH

As one of the first companies to become an AWS Premier Partner, a Microsoft Azure Gold Partner, and recognized by Gartner® as a Leader and Challenger among Managed Service Providers, 2nd Watch is audited, approved and accredited—offering you a team of highly trained and certified AWS and Azure cloud experts. Our TESTED, PROVEN and TRUSTED solutions allow you to fully leverage the power of the public cloud. We are your partner, working along side of you, to design, deploy and manage your public cloud environment.

Gartner.
