

CLOUD SECURITY RAPID REVIEW

Protection from Immediate Threats

Do you need a quick, yet comprehensive security measurement for your cloud environment? **2nd Watch's Cloud Security Rapid Review is a 2 week, or shorter, assessment that measures your cloud environment against the latest industry standards and 2nd Watch best practices, so you know what needs to be done, ASAP.** This service will provide you a list of vulnerabilities and actionable remediations, a review of your Incident Response Policy, and a consultation for the systemic issues that are causing these vulnerabilities.

WHAT YOU GET

SECURITY ASSESSMENT against the latest CIS Benchmarks for your AWS and Azure environments.

QUESTIONNAIRE according to the Security Pillars for AWS and Azure.

ACTIONABLE RECOMMENDATIONS for aligning the following areas with CIS Benchmarks: Identity and Access Management, Security Center, Storage Accounts, SQL Services, Logging and Monitoring, Network, and VMs.

INCIDENT RESPONSE POLICY review and recommendations.

THREATS PRIORITIZED by risk.

EXECUTIVE SUMMARY of security posture.

CONSULTATION ON FINDINGS with a 2nd Watch security expert.

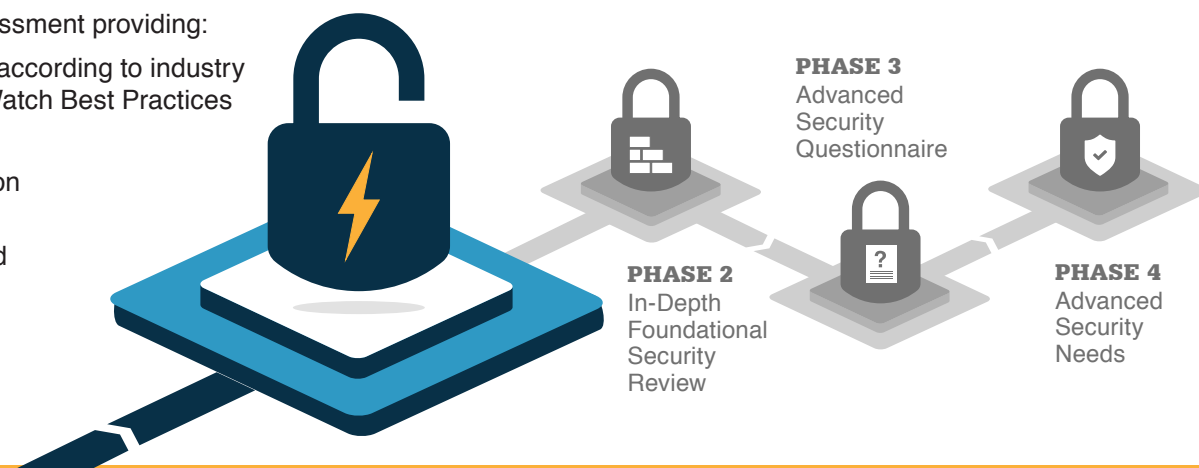

The Cloud Security Rapid Review is Phase 1 of our 4-phase Security Maturity Assessment program, designed to harden your entire cloud environment with tailored security based on your use cases.

2nd Watch's Cloud Security Rapid Review is designed to give you an initial security assessment, fast. The report details the parts of your AWS and Azure environments that run afoul of the industry standard CIS Benchmarks and provides your security and development teams with recommendations they can act on immediately.

PHASE 1 Rapid Review

1–2 week security assessment providing:

- List of vulnerabilities according to industry standards and 2nd Watch Best Practices
- Threat prioritization
- Actionable remediation recommendations
- AWS Well Architected Framework Security Pillar Questionnaire
- Review of Incident Response Policy

OFFER

Cloud security review and recommendations based on industry standards and 2nd Watch best practices, incident policy review, and a consultation from 2nd Watch's security experts.
