

## About Us

We Help You Leverage the Innovation of the Cloud to Improve Your Business

For over a decade, 2nd Watch has walked alongside our clients to help them navigate and embrace change to provide better customer experiences through the blend of technology and innovation that is at our core. Our best of breed services deliver cloud native capabilities in strategic consulting, workload design, technology deployments and workload management to enable our clients to have the agility of a growth company and the security of a leader.

As one of the first companies to become an AWS Premier Consulting Partner, we're also a Microsoft Azure Gold Partner, a Google Cloud Partner and an audited, approved and accredited Managed Service Partner—offering you a team of highly-trained, 100% cloud-focused experts.

## INVOLVE. SOLVE. EVOLVE.

2nd Watch's Cloud Services solutions are tailored for our clients and utilize a combination of expertise, automation and software to achieve faster business outcomes that work the first time. **We get involved with you and your business to solve challenges or exploit market opportunities and evolve your business to be more competitive.** The result for our clients is a faster adoption rate, more agility and greater business value. Our approach has been successful for some of the world's leading brands and is tested, trusted and proven to accelerate your cloud adoption.

Our consultants walk alongside you through your journey to the cloud, from Assessment to Management. We help clients modernize their businesses with our core practice areas:

### Cloud-Native & DevOps

We help you define your Cloud Native and DevOps approach, evaluate your process and automation to determine more agile implementation and development practices, design and build your continuous integration and delivery pipeline and machine image factory to ensure compliance, security and governance, design and build automation and orchestration, and design and build your Infrastructure as a Service (IaaS) platform.

### Mass Migration

Our mass migration program is designed to get you up and running in the cloud fast while maintaining business continuity. 2nd Watch has a proven methodology from design and deployment through management.

### Security & Compliance

2nd Watch has been securing global brands' public and internal workloads for over a decade with a trusted approach based on cloud best practices and an industry leading cloud management platform. We are the only cloud-native company to earn cloud SOC2 compliance.

### Optimization

Behind our solutions for cloud optimization is a team of experienced data scientists, architects, and software that help you maximize the performance and returns of your cloud assets. We provide consulting and reporting services to give you the visibility necessary to make data-driven decisions and apply our 6 pillars of cloud optimization, **reducing your costs by 25–40% over self-management or software alone.**

### Managed Services

Our Managed Cloud Solutions have helped clients save 42% more than managing cloud services alone. We help our clients tailor and integrate managed cloud solutions that holistically and proactively encompass the operating, financial, and technical requirements for scaling long-term use of public cloud.

### Data & Analytics

Being data-driven is a mindset. Our approach is action-oriented so you have frequent wins to share with your team—early and often—building momentum and credibility, utilizing best-practices and secure engagements for your data initiatives.
