

MANAGED CLOUD FOUNDATIONAL SERVICES

Flexible services for managing public cloud resources while optimizing spend and utilization

As enterprises increasingly migrate applications and workloads to the cloud, the need to manage, monitor, and optimize IT infrastructure becomes ever more complex. Many internal IT departments lack the bandwidth or expertise to operate the cloud environment effectively without impacting their ability to support new projects or business goals.

2nd Watch's Managed Cloud Foundational Services provides a simplified, flexible set of core services to manage single and multi-cloud infrastructure with the opportunity to utilize premium services to better control resource usage, spend, and utilization. The all-in-one offering maintains simplicity while addressing the key needs to better manage spend, utilization, and operations.

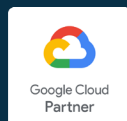

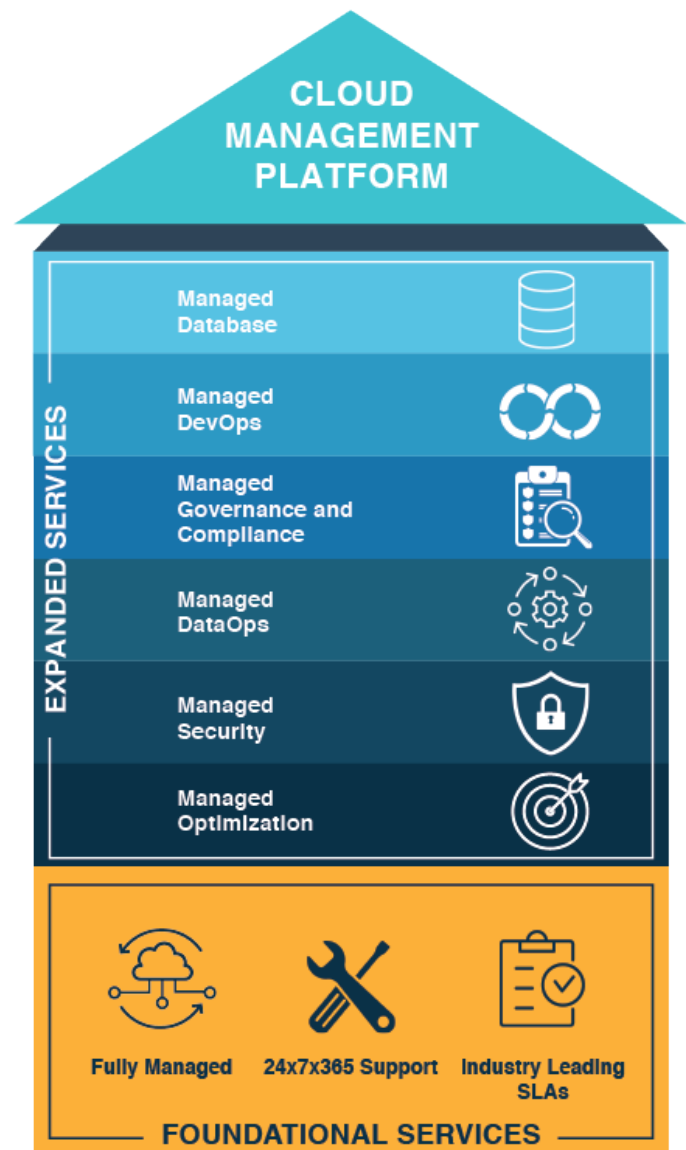

COMPREHENSIVE CORE SERVICES

Our Cloud Management Platform includes:

- Infrastructure Monitoring / Alerting
- Fully Integrated Ticketing System
- Multi-Cloud Support
- Data Driven, Real-Time Analytics
- Automation
- Security / Compliancy
- Optimization
- DevOps

WHY OUR CLOUD MANAGEMENT PLATFORM?

- Multicloud Management: AWS, Azure and GCP
- Leverages Cloud Native and SaaS-Based Tools
- Modular and Customizable
- Avoids Cloud Lock-In
- Built in Standardization and Repeatability

CLOUD MANAGEMENT PLATFORM

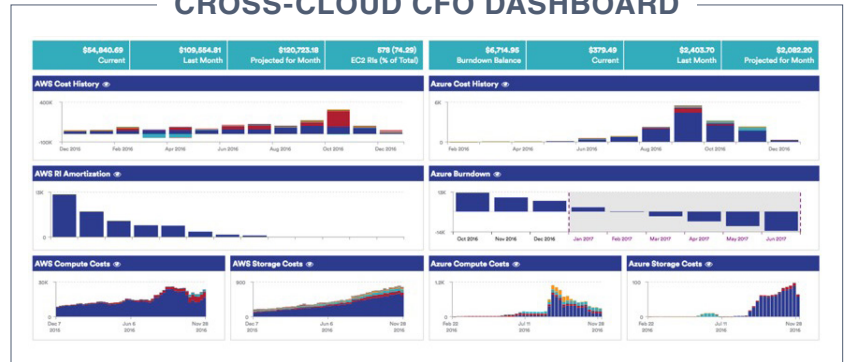

YOUR SINGLE PANE OF GLASS TO IMPROVE EFFICIENCY AND GOVERNANCE OF YOUR DIVERSE ECOSYSTEM

Foundational Services includes access to the industry-leading cloud health management solution provided by CloudHealth by VMware. With CloudHealth, we provide a consolidated view across your dynamic and fast-changing cloud environment, so you can provide key stakeholders, like Executives and Cost Center Owners, visibility into their cost and usage trends as well as the ability to automatically identify and remediate inefficient resources and security vulnerabilities.

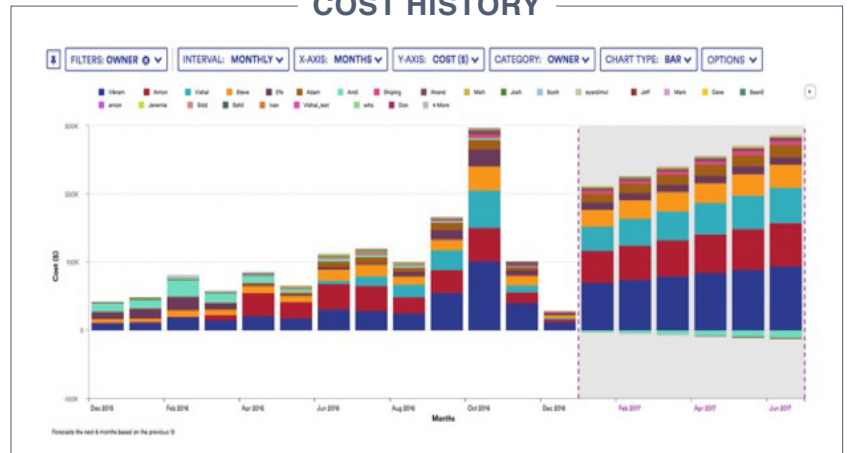

Without a focus on cost optimization, you could be overspending on cloud costs by more than 70%.

With Foundational Services, you obtain self-service visibility across your entire cloud ecosystem to optimize resources and define governance policies for ongoing management.
