

AWS Redshift Health Assessment

You can and should get more from your data

For a competitive business to remain competitive, data is more important than ever before. That is why you selected AWS Redshift—a safe and secure modern data warehouse—to store one of your most valuable assets, your data.

Easier to set up, deploy, and manage than other data warehouses, AWS Redshift scales to meet your needs in a cost-effective manner while ensuring your data's safety and security. Plus, Redshift lets you analyze your data directly from the data lake, providing you the insights and answers you need quickly.

But, are you getting the analytics results you expected from Redshift or are you experiencing some of these common challenges?

- Routine queries are taking too long
- Queries are stacked in a queue
- Costs are much higher than anticipated
- You have too much “hot” data
- You're experiencing low utilization
- Clusters are filling up
- New analytic needs are not being addressed
- Resources are being over consumed

SOLUTION

You can, and should, get more from your data.

2nd Watch's AWS Redshift Health Assessment helps you overcome these challenges. As a long-time AWS Premier Consulting partner with over a decade of experience, we have perfected our Redshift optimization approach.

The AWS Redshift Health Assessment is a 2-week engagement that ensures your AWS Redshift cluster usage aligns to your unique business goals. Our Redshift experts design a comprehensive data strategy roadmap unique to your business and focused on optimizing your data warehouse to achieve peak performance and to enable you to get the data answers you need quickly and reliably without wasting resources.

With an optimized Redshift cluster, you will experience:

**LOWER
INFRASTRUCTURE
COST**

**QUERY
QUEUEING
DOWN TO ZERO**

**NO DEADLOCKING,
INTERRUPTED, OR
DROPPED QUERIES**

**MODERN
SECURITY
FEATURES**

**MORE
PRODUCTIVE
ANALYSIS**

Better, informed decision-making is a necessity for your business. It doesn't have to be overly expensive or time-consuming just to access your own data. Visit offers.2ndwatch.com/aws-redshift-health-assessment-get-started to begin developing your recovery plan today.
