

FINANCIAL CONSOLIDATION

Accelerating integration and consolidation of financials for serial acquirers

Quickly integrating the financial data for newly acquired companies can accelerate your growth. Pairing financial data integration with key operating KPI data can additionally enable quicker operating performance improvements as you continue to scale. 2nd Watch's unique financial consolidation model and accounting templates can help you to achieve both.

2nd Watch has built financial roll-up models and financial data warehouses that help you deal with diverse accounting policies and heterogeneous COAs. With the right templates and quick access to the data, you can focus on scaling and growing your business.

BUSINESS VALUE DELIVERED

Faster financial consolidations, with automated QA and data validations

Financial integration playbook for future acquisitions

Reduction of manual effort and FTEs doing your consolidations today

Ready source of data insights from standardized financial metrics and measures

A 2nd Watch Success Story

A private equity-backed roll-up of healthcare providers needed better financial consolidation data and tools to overcome the excessive manual consolidation that was limiting their growth. 2nd Watch helped this company build flexible financial data models and data pipelines to automate the entire integration process.

With a new centralized financial cloud data warehouse, the company is building and deploying operating dashboards to more quickly achieve optimal performance from every provider they acquire.

Our financial integration experts will assess your financial data integration plans through a complimentary 90-minute whiteboard session. Contact us today to schedule your session.
